

**Main Flow:**

- 1. Karoline navigates to her site
- 2. Karoline logs into her account.
- 3. Karoline accesses the admin section of her website (i.e. the Content Management System (CMS)).
- 4. Karoline accesses the list of existing dessert flavor options using the CMS.
- 5. Karoline enters the new dessert flavor’s name.
- 6. Karoline enters the new dessert flavor’s description.
- 7. Karoline clicks the submit button.
- 8. The CMS sends the new dessert flavor information to the database.
- 9. The database receives the new dessert flavor information.
- 10. The database stores the new dessert flavor information in the related table.
- 11. The use case ends when the CMS receives data from the database that includes the newly created dessert flavor option.

Use Case 22: Create Dessert Flavor
