

Use Case 19: Create Cake Type
Sequence Diagram

Main Flow:

- 1. Karoline navigates to her site
- 2. Karoline logs into her account.
- 3. Karoline accesses the admin section of her website (i.e. the Content Management System (CMS)).
- 4. Karoline accesses the list of cake types using the CMS
- 5. Karoline enters the new cake type's name
- 6. Karoline enters the new cake type's description.
- 7. Karoline clicks the submit button on the CMS.
- 8. The CMS sends the new cake type information to the database
- 9. The database receives the new cake type information.
- 10. The database stores the new cake type information in the related table.
- 11. The use case ends when the CMS receives data from the database that includes the newly created cake type.
