Use Case 31: Update Payment Type
Sequence Diagram

Main Flow:

1. Karoline navigates to her site

2. Karoline logs into her account.

3. Karoline accesses the admin section of her website (i.e. the Content Management System (CMS)).

4. Karoline accesses the list of existing payment type options using the CMS.

5. Karoline updates the existing payment type name.

6. Karoline clicks the submit button.

7. The CMS sends the updated payment type information to the database.

8. The database receives the updated payment type information.

9. The database stores the updated payment type information in the related table.

10. The use case ends when the CMS receives data from the database that includes the updated payment type option.
